2nd Prize

SONY DVD PLAYER DVPS330 (worth £129)

3rd Prize

SONY PORTABLE CD PLAYER DEJ885 (worth £79)

10

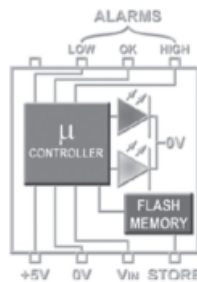

FPSI 1010 EVALUATION KITS

All competition entries will be put into a prize draw. The first 10 to be drawn will receive an FPSI 1010 Evaluation Kit (worth £40)

Think of an application for the Lascar Electronics FPSI 1010 module and you could win one of these great prizes.

The FloPSI Series (Flash Programmable Status Indicator) is a range of compact LED modules that switch between bright red and green at two separate user programmed levels. Once defined by the user, the setup information is stored in flash memory, which can be programmed as often as you like.

The FPSI Series can be used in countless applications, especially where a simple, universal "GO/NO GO" indication is required.

In association with Lascar Electronics Ltd, *Everyday Practical Electronics* is running a competition to find the best application idea for the new FloPSI module. We want to hear about all your ideas, from novel uses for the FPSI 1010, to advanced application ideas utilising all of FPSI 1010's features. To find out more about this exciting product download a datasheet from:

www.lascarelectronics.com

To enter the competition all you need to do is fill out the form below and send it to the address below before February 13th 2004. The 1st prize will be awarded to the reader whose application suggestion is, in the opinion of the judges, the most innovative and novel idea. The judges' – drawn from the directors of Lascar Electronics Ltd and Wimborne Publishing Ltd – decision is final and no correspondence will be entered into. Illegible entries will be excluded. No responsibility will be accepted for the non-receipt of entries. The names of the prize winners will be published in the April 2004 edition of *Everyday Practical Electronics*.

Send to **Everyday Practical Electronics, FLOPSI Competition, 408 Wimborne Road East, Ferndown, Dorset BH22 9ND**

FLOPSI Competition Entry Form

Name: My suggested application is:

Company (if applicable):
